

MACKILLOP CLUB UPDATE 12/10/17

This week saw the culmination of the students' 'Shark Tank' project, which began back in Term 3.

Students were required to identify and develop an idea for a product or business that fills a gap in the market, with the potential to become commercially successful.

They then had to make a 'pitch' to a panel of four Sharks, who had one million (fictional) dollars each to donate towards the young entrepreneur/s with the most impressive pitch.

Congratulations to Byron Fisker, who was our Champion, earning just over a million dollars in total towards his concept- the Tooth-o-Matic automatic toothbrush.

Congratulations must go to all of the students who participated. Each of them put considerable work into this project and there were some very creative ideas indeed.

Brett Wilkie
Assistant Principal
