- Challenge and adventure activities (camp)
- Tobacco/drug/alcohol awareness

Technology

- Continued use of Sphero's/Micro: bits to develop computer programming skills

Physical Education

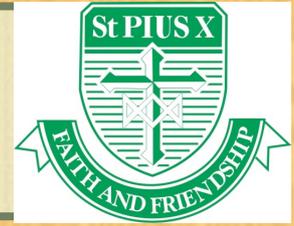

- Students will practise a variety of skills related to Football and Netball in preparation

Art

- They produce and enhance their finished artwork by manipulating a range of complex shapes, using and manipulating a variety of line types, exploring descriptive, expressive and symbolic use of colour, selecting different types of actual and implied texture, organising space using a range of visual devices, and creating values through mixing and manipulating various media.'

YEAR 6 - LEARNING OUTCOMES

Term Three Focus: Immigration

Science

Year 6: 'Earthquake Explorers'

Major earthquakes cause dramatic changes to the Earth's surface. Strong earthquakes can affect millions of lives by causing buildings to collapse, destroying roadways and bridges and affecting basic necessities such as electricity and water supply. Fortunately, the majority of earthquakes are barely noticed. It is still not possible to accurately predict where and when an earthquake will happen. However, greater understanding of their causes helps scientists estimate the locations and likelihood of future damaging earthquakes.
