

Safety Online Parent Resources

Invaluable information for parents about online safety for you and your children can be found on [The Office of The Children's eSafety Commissioner](#) . There are many pages to scroll through; however, below provides a quick link to a wealth of information. Just click on the image below to read through this cache of information.

eSafety Issues:

Although difficult topics to tackle, the information provided in this section of eSafety Issues, arm parents with the knowledge to discuss these matters with your children and to take measures to create safe online environments for our children.

Balancing online time	Cyberbullying	Digital reputation
Offensive or illegal content	Online gaming	Protecting personal information
Image-based abuse	Sexting	Social networking
Trolling	Unwanted contact	

eSafety Partners:

A list of many Australian and overseas trusted partners and online safety websites that help guide our children towards safe and enjoyable experiences online.

Games, apps and social networking:

A quick and comprehensive guide to over 60 games and apps, providing general information, safety guidelines for parents, safety tools, safety resources, support, reporting, privacy and security and FAQs. Definitely a go-to page for parents wanting to know more about the apps their children are on or 'wanting' to access.

airG	Alibi Witness	Animal Jam
Ask.fm	Bing	Call of Duty
Clash of Clans	Club Penguin	Counter-Strike
Defense of the Ancients	Facebook	Facebook Messenger
Flickr	Foursquare	Ghost, safe or decoy apps

Get Help:

Provides a full list of sites to support children and parents

iParent:

This is a dedicated page for parents with many more topics to explore, including an interactive guide. Certainly worth bookmarking!

Along with the busyness of having school aged children, work and simply the busyness of 'life', it is often very challenging to find the time to explore the information that we so often want in order to be armed with knowledge relating to our, and our children's digital environment. With these easy links and saving them to your bookmarks, use this handy guide as a reference point for all things cyber-aware and cyber-safe.
